Newron System and LOYTEC team up to provide an "everything but the application" solution.

Open LonMark Systems are increasing. Open networks need to interconnect several application products into an open solution. LOYTEC now to distributes Newron products to provide every piece needed for interconnection: software, infrastructure, training and expertise.

Newron System's core business is developing advanced software solutions for LonMark Open Systems. LOYTEC's core business is developing advanced infrastructure solutions for open systems. Both companies commit to offer the latest technical innovations in these fields to their customers. Newron and LOYTEC team up and cooperate, proof the speed of innovation and long term commitment to support LonMark Open Systems.

We will further build and expand our existing capabilities and resources throughout Europe. Combining our forces will be an exciting step forward for our customers. Our aim is to offer an increased choice of innovative products for building automation network management and network infrastructure.

The combination of Newron System software and LOYTEC infrastructure products enables a fast, easy and cost-effective integration of LonMark systems. "Any enterprise involved in integrating LonMark Open Systems needs to standardize a product line to build up its own solution and prevent from reinventing the wheel at system level" said Serge LE MEN chief executive of Newron System. Hans-Jörg Schweinzer, president of LOYTEC adds to this: "A very effective infrastructure product range combined with the largest and most innovative software family on the market offers the best solution to maximize our mutual customer benefits."

NEWRON SYSTEM SA

Newron System is the leading European software company for LonMark Open Systems. Founded in 1993, Newron System has been committed to developing LonWorks system and solutions, and has specialized in LonWorks tools and software for over 6 years. Our proven expertise has been channelled into providing integrators with an easy-to-use, cost effective and reliable software range.

Newron System's aim is to reduce integration time and costs, and facilitate system design. We offer a complete range of software to manage, maintain and supervise LonMark Open Systems.

With years of experience devoted to LonWorks technology, Newron System is a recognized market leader for LonWorks software supplier.
