

Press release

Vienna, November 5th, 2010

LOYTEC once again among the most successful companies of Austria:

Winner of Austria's Leading Companies 2010 award

Since twelve years by now, Austria's most successful companies are selected every year to get rewarded with the title "Austria's Leading Company". And once again LOYTEC electronics GmbH could conquer the winner's pedestal: First Place in the state of Vienna within the rating of small enterprises. The countrywide ranking resulted in the excellent Third Place. After the two victories in 2008 and 2006, LOYTEC for the third time could succeed and win this well-recognized and prestigious competition of Austria's business elite.

The ceremony for the winners of this year took place on the 4th of November at the imperial palace in Vienna. Dr. Dietmar Loy, CTO and mastermind of the high tech company, was visibly pleased to receive the award out of the hands of Brigitte Jank, president of the Viennese economic chamber.

"We are proud and happy to be among the winners, for the third time now. We judge this as approval of our long term business strategies and innovative drive of our highly specialized employees and pioneering products", Dr. Loy points out.

Like in the year before, strong focus in performance consideration was set on sustainable development. Just as much cash flow and return on equity

were important indicators within the rating system to identify solid business models.

The competition to become one of Austria's Leading Companies is held by WirtschaftsBlatt, Pricewaterhouse Coopers and KSV 1870 every year to determine regional and national champions in 3 classes of enterprise sizes (big player, golden mean and solid small enterprise).
