LOYTEC Input Devices achieve DALI-2 certification

LOYTEC electronics is proud to announce that its LDALI-BM2 Pushbutton Couplers and its LDALI-MS2 Multi-Sensors successfully passed the DALI-2 certification process. LOYTEC is one of the first companies in the world and the first supplier in Europe to successfully implement the recently available DALI-2 certification for DALI-2 input devices.

The DALI-2 certification is run by the Digital Illumination Interface Alliance (DiiA), an open consortium of lighting companies that promotes the global adoption of digital lighting-control systems using DALI technology. Only certified products can carry the DALI-2 logo. The DALI-2 certification brings the promise of significantly improved interoperability as well as additional functionality compared with current DALI (version 1) systems in the market.

Hans-Jörg Schweinzer, CEO of LOYTEC electronics, states: “We are thrilled to be among the first companies in the industry to have DALI-2 certified devices. Once again LOYTEC proves its strong dedication to be a leading edge technology provider in building automation.”

DALI-2 certified devices are listed in the product database available on the DiiA web site. As more DALI-2 certified products become available planners and system integrators will be able to choose from a wide range of products to deliver a complete DALI-2 lighting system.

About LOYTEC electronics GmbH

Founded in 1999, LOYTEC electronics GmbH today ranks among the leading European providers of intelligent networked control products for building automation. There, LOYTEC exclusively relies on open and standardized communication protocols. In April of 2016, LOYTEC joined the Delta Group family, a leading power and thermal management provider, serving as a center of excellence for Delta's Building Automation Business. LOYTEC develops, manufactures, and distributes router and gateway solutions, embedded Automation Servers and I/O Controllers, the room automation system L-ROC, DALI lighting controls, the VAV system LIOB-AIR, and also graphical user interfaces in the form of touch panels or via PCs or mobile devices.

About DiiA

The Digital Illumination Interface Alliance (DiiA) is an open, global consortium of lighting companies that aims to grow the market for lighting-control solutions based on Digital Addressable Lighting Interface (DALI) technology. DiiA was established in response to industry requests for an independently-verified DALI-2 certification program that covers the functionality specified in version 2 of the IEC 62386 family of international standards. DALI-2 certification brings the promise of significantly improved interoperability and additional functionality compared with current DALI systems in the market. DiiA is a member program of the IEEE Industry Standards and Technology Organization (ISTO). For more information, see www.digitalilluminationinterface.org.
